

Community. Continuity.

A Numbers-based Approach

Setting Aside Your Differences

We challenge you to take a step back. To look at this proposal as if you were a third party consultant with no emotional ties to any specific area, neighborhood, or school.

Current High School Over Enrollment

1%

13%

12%

64%

54%

Goal #1: Balance

A statement made by the West Ada School District explained, "To achieve equal enrollment, all high schools would be 17% over capacity."

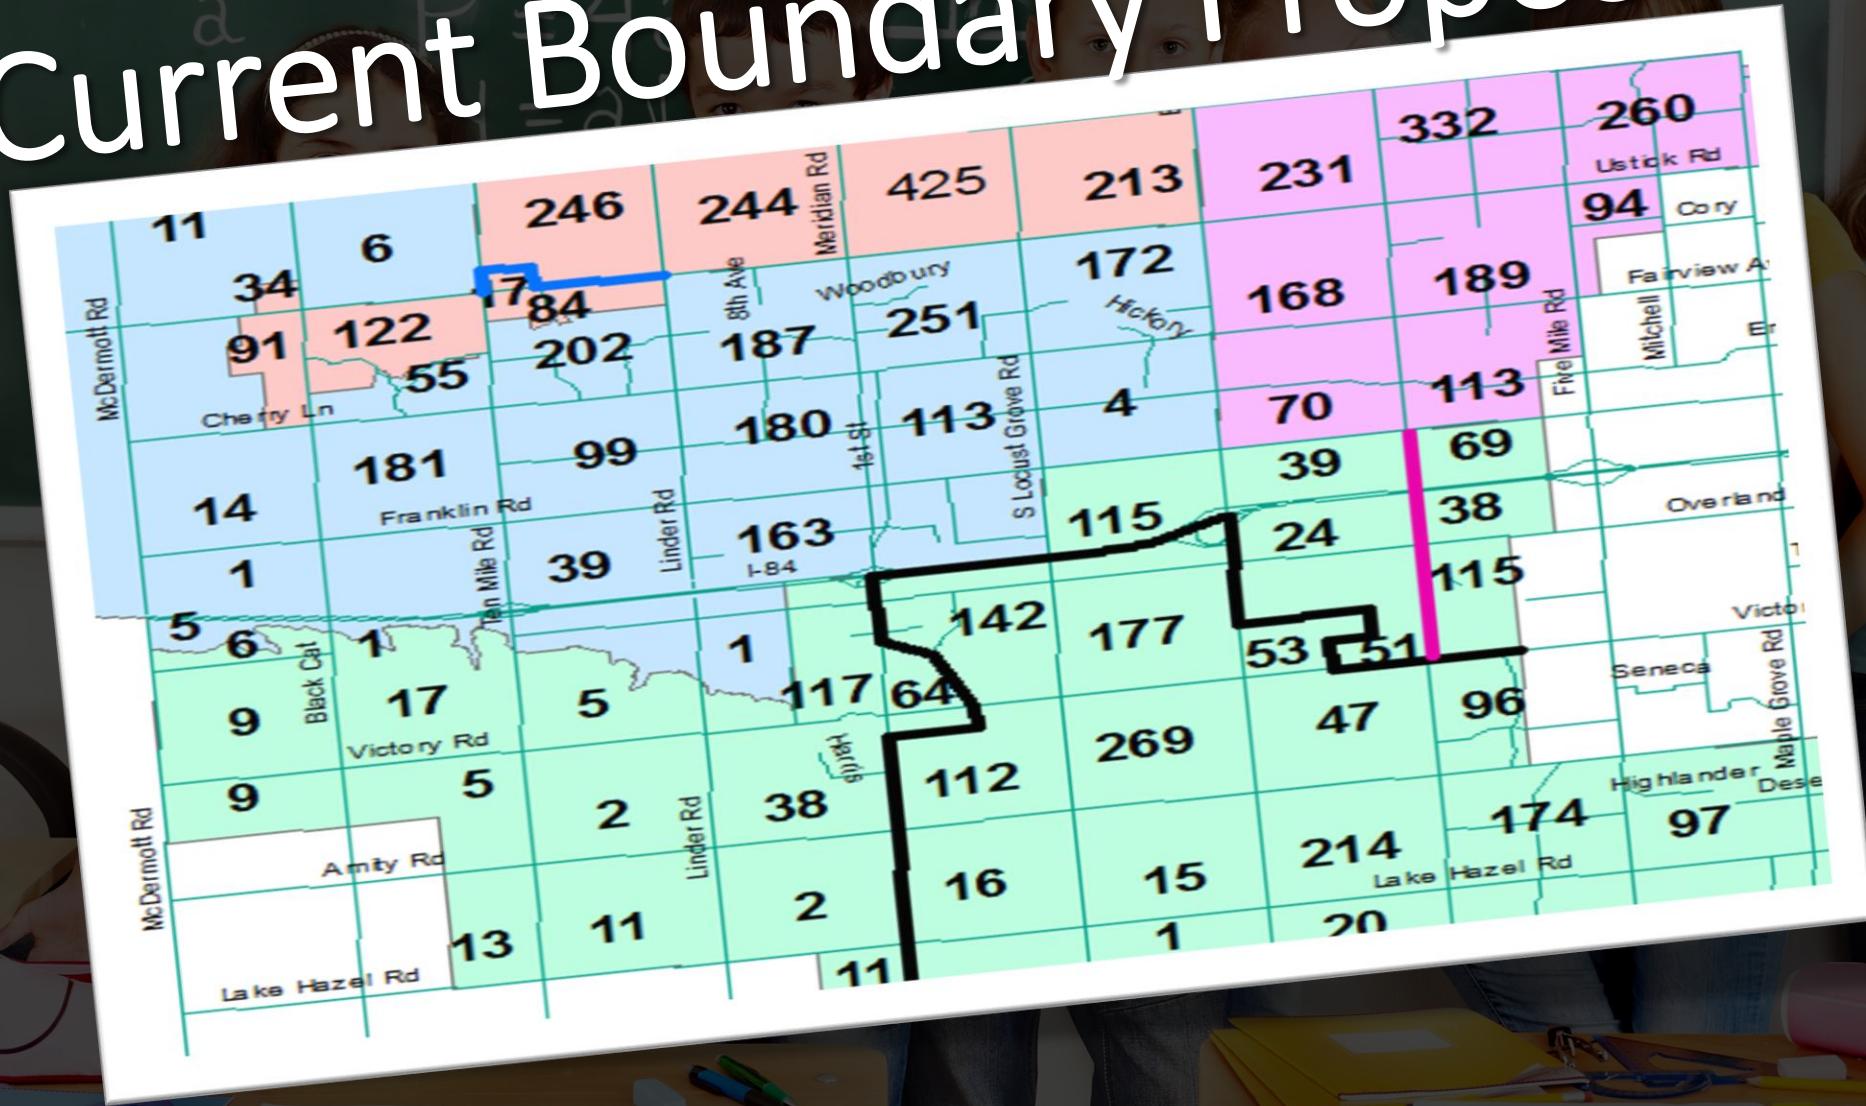

Lewis & Clark Middle School

Goal #2: Community

A top consideration set by the district is to, “Aligning middle school attendance areas with high school attendance areas.” Current LCMS is the only school that divided its student body to multiple high schools.

Current Boundary Proposal

Goal #3: Continuity

Is simplicity the best or simply the easiest? In this case we can achieve both. The current plan seems to avoid this "simple" concept, specifically with regards to where LCMS students are sent for high school.

Working For a Better Solution

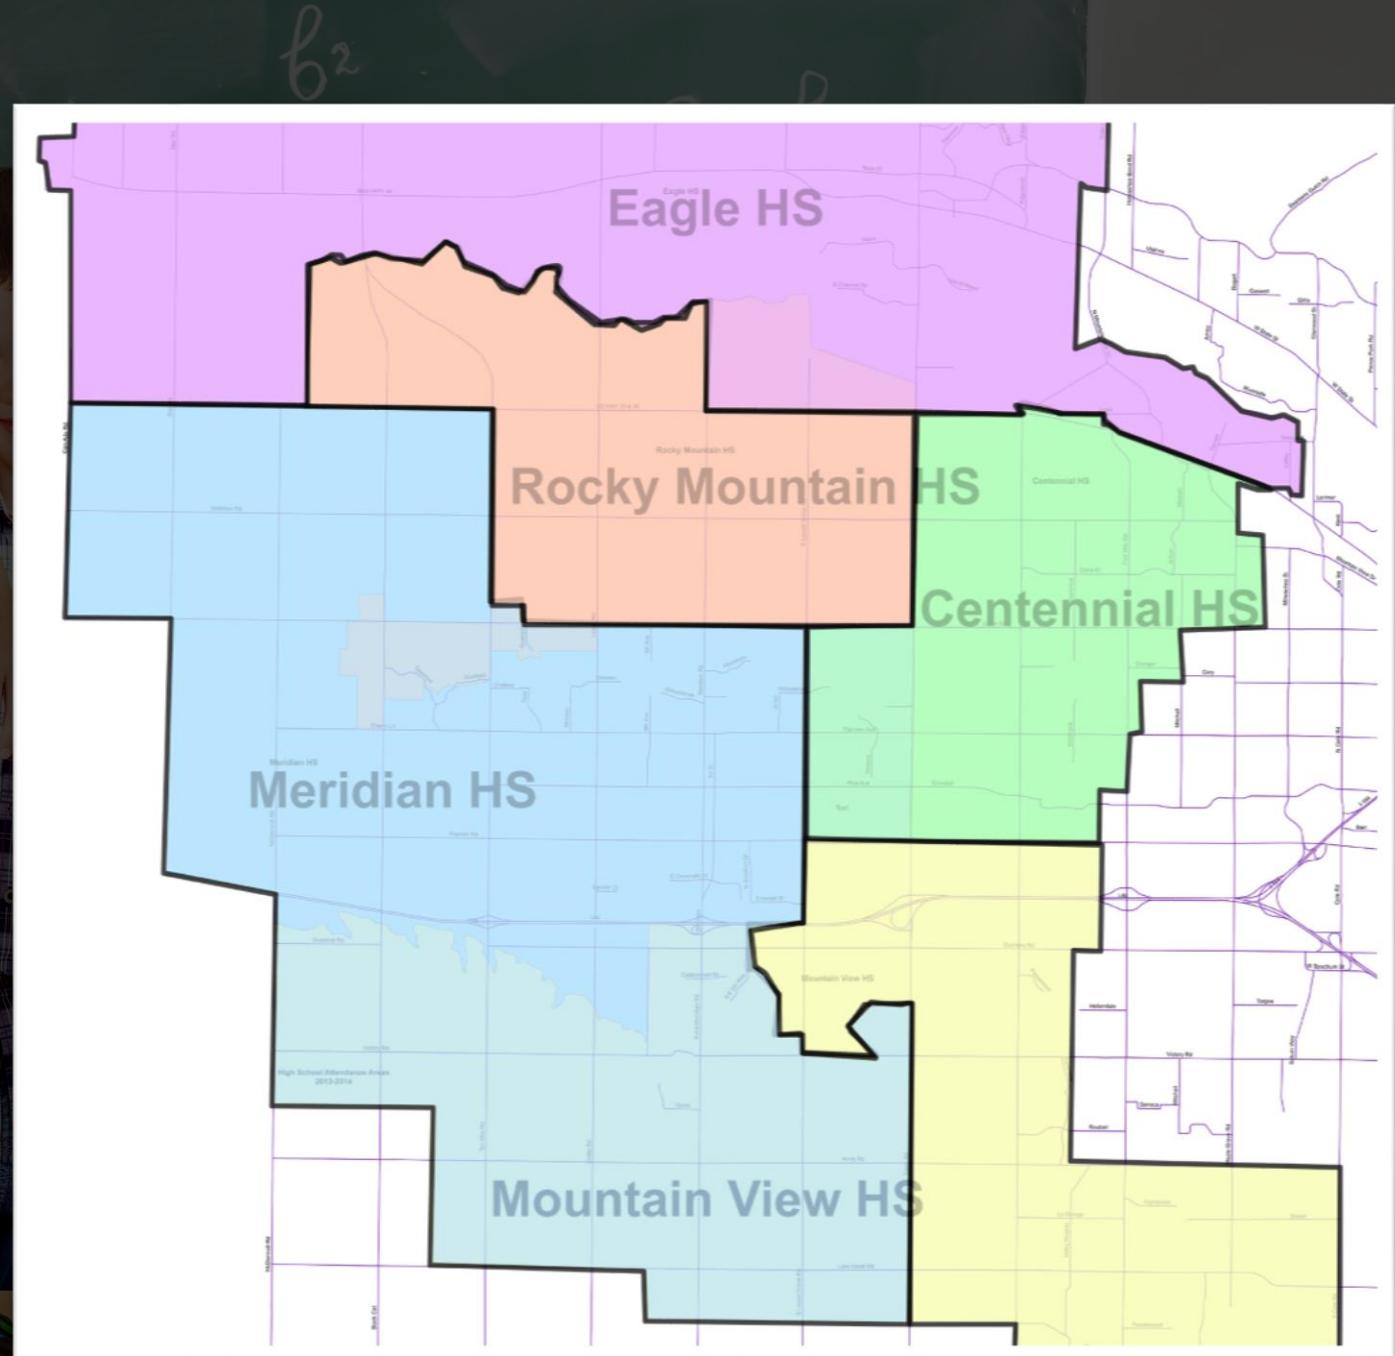

A photograph of six young children, three boys and three girls, standing in a row in what appears to be a classroom setting. They are all smiling and looking towards the camera. Behind them is a chalkboard filled with various mathematical formulas and calculations, including $S = a^2$, f_2 , and $a + b = c$. The students are dressed in casual clothing, such as t-shirts and jeans. In the foreground, there's a wooden desk with some school supplies like pencils, a ruler, and a pink pencil case.

Any plan proposed and approved by the committee should address the well-being of our great students as top priority. These priorities should be centered around community, continuity, and equitable distribution.

Alternative Boundary Plan

We want to encourage the committee and school board to keep the students and their well-being as the top priority. In other words, do not force students to make this critical transition without the social support of their peer group.

**Let's put personal agendas aside
and keep the focus on our kids.**

Considerations: Rocky Mountain

The enrollment at Rocky Mountain is a hard challenge to solve due to the population density of North Meridian. The Alternative Boundary Plan follows the same realignment strategies as the current plan proposed by the committee.

Goal #1: Balance

17%

18%

8%

18%

23%

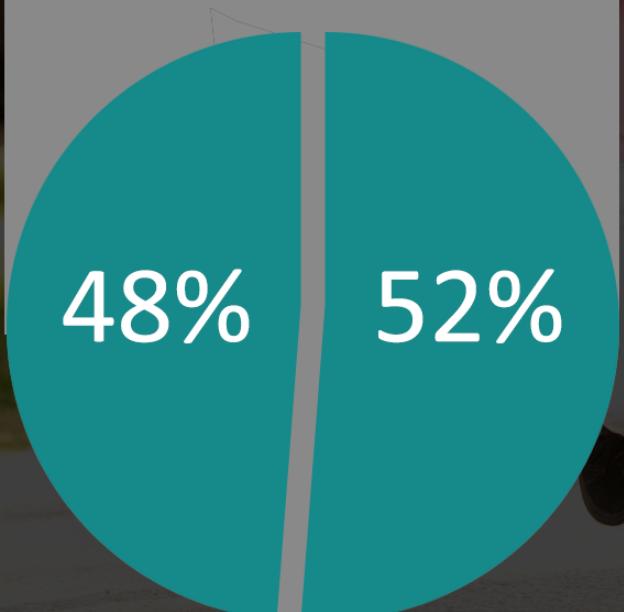

Goal #2: Community

Lewis and Clark Middle

48% would attend
Centennial High School

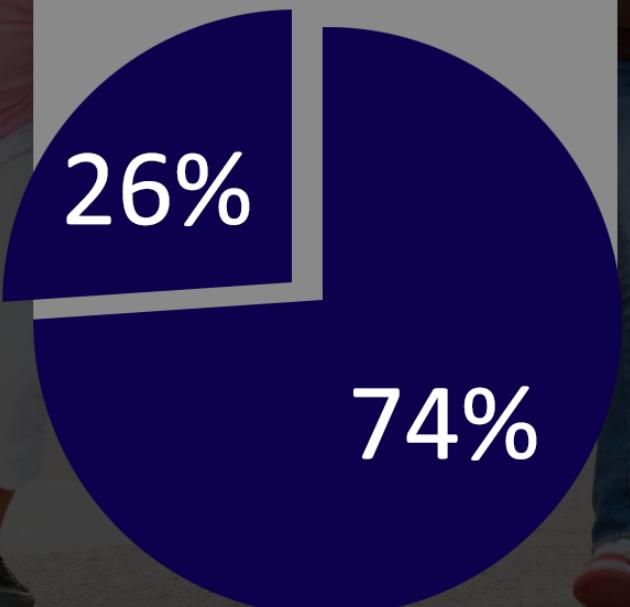

52% would attend
Mountain View

Sawtooth Middle

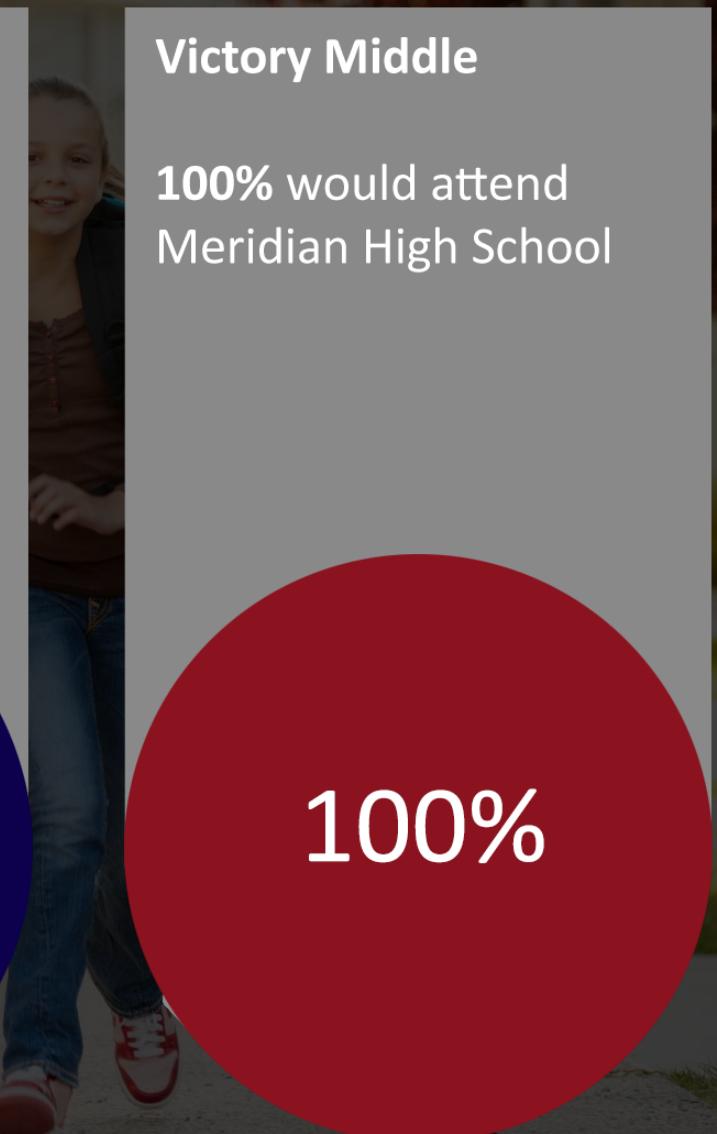

26% would attend
Meridian High School

74% would attend
Rocky Mountain

Victory Middle

100% would attend
Meridian High School

Goal #3: Continuity
